

Quality in Action...

Olds has been upholding its tradition of fine quality musical instruments for more than six decades. From its modest start as a fine producer of handcrafted, professional quality instruments, F. E. Olds & Son has grown over the years to become a leading manufacturer of superior horns.

In order to satisfy all of today's discriminating performers, the Olds Company continues to improve and refine their complete line of band instruments. Olds was first to draw its own slide tubing. First to use nickel-silver tubing for slides. And first to develop a fluted trombone slide to reduce friction. The special rotary valve self-oiling feature on its French horns and the use of special alloys in bell sections to produce different timbres were also developed by Olds. And Olds again led the industry in equipping student trumpets with professional top-sprung valves.

The expertise and experience garnered by three generations of Olds craftsmen is carefully blended into each instrument built by these artisans . . . instruments designed to surpass the demands of every performer.

F. E. Olds & Son Band Instruments.

A-5

AMBASSADOR CORNET

The A-5 Ambassador Cornet was designed to help a young student begin playing like an old pro. It has everything essential to developing fine musicianship . . . good intonation, balanced range, flexible response, easy tone production plus rugged durability. Olds' A-5 Ambassador gives the beginner a real head start. Comes with professional Giardinelli mouthpiece.

M:5

MELENDEZ CORNET

The M-5 Mendez Cornet was designed under the strict personal supervision of the great trumpet virtuoso, Rafael Mendez. His rigorous demands have resulted in a horn with the appearance of a trumpet and the rich, full timbre of a fine cornet. Accomplished musicians can appreciate the great time and care that went into the M-5 Mendez Cornet.

W-10

PINTO

The Olds Pinto is truly the most revolutionary trumpet today. It was specifically designed to meet the many crucial needs of the beginner. The free-blowing "straight through" air system is normally found only in expensive professional models. The modular design permits very rapid repairs, as the horn disassembles into three basic parts. The brass valve assembly is enclosed in Valox™, an almost indestructible acoustic material. Thanks to these and other outstanding features, the student won't remain a beginner for long when he plays the W-10 Pinto Trumpet.

SPECIFICATIONS

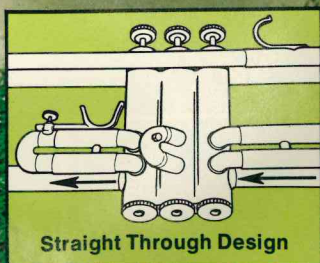

VALVE BORE: .460"

MATERIALS: Brass; baked epoxy finish — Valox™ enclosed brass valve assembly.

WEIGHT: 34¾ oz.

BELL: 4¾"

Supplied in a Durable, attractive case with accessories.

A-10

AMBASSADOR

For over 25 years the Ambassador has been acknowledged as one of the finest student instruments available. Its tapered mouthpipe offers easy blowing, while the finely calibrated bore assures full, rich tones with superb carrying power. The smooth valve action with top sprung pistons responds to the lightest, fastest touch. And exclusive three-point bracing gives the Ambassador the rugged durability necessary for student use. The A-10 even comes with a professional Giardinelli mouthpiece. The Olds Ambassador is truly a professional quality trumpet at a student price.

S-12

SUPER

The S-12 Super Trumpet is a natural leader. It lets the advanced stage, concert or marching band musician stand out with a commanding sound. The extraordinary new Ultra Sonic design – a solid one-piece bell with no seams – delivers a full, rich sound unparalleled by traditional horn designs. Oval bracing adds strength . . . not weight. The nickel-silver tone control band projects full, flexible tonalities. And VT valves with Valox™ give the musician even more fine control of his performance. The S-12 is available with a brass or bright silver finish. Either way, the Super Trumpet delivers a super sound that puts you way up front.

M-12

MELENDEZ

Olds' craftsmen designed the M-12 in collaboration with the distinguished trumpet artist, Rafael Mendez. The combination of efforts brought about an instrument that has been a favorite among the finest professionals for years. And now it's even better. The revolutionary new Ultra Sonic design features a solid one-piece bell with no seams. It delivers the finest, purest sound possible. The M-12's special lightweight brass alloy has superior carrying power. And the new VT valves with smooth Valox[®] valve guides give the musician a sensitive "velvet touch." Only Olds could satisfy the critical demands of such a fine artist. And only Olds can pass on to you the excellent performance of the M-12 Mendez Trumpet.

P.12

CUSTOM IN B \flat

Olds' engineers subjected the P-12 Trumpet to five years of extensive testing by leading professionals before going into final production of the horn. This fine care and patience resulted in a trumpet that is rapidly becoming the favorite among top artists from every field of music. The Custom features the revolutionary Ultra Sonic design – a solid one-piece bell with no seams. Ultra Sonic delivers superb sound, never before possible from traditional trumpet designs. The Custom is a lightweight instrument with a powerful sound that's ideal for stage band, concert and symphonic work. And the VT valves with smooth Valox[™] guides insure quiet, fast, fully responsive action. The more demanding your tastes, the more your tastes demand the P-12 Custom Trumpet.

C:12

CUSTOM IN C

The C-12 is completely new to the marketplace, but it's already an "established" horn that's backed by years of research and development. It was produced under the careful guidance of several leading artists and educators to meet today's rigorous demands for a C trumpet to play both band and orchestral works. The bright silver finish gives a superior appearance and an even better sound. And the VT valves with smooth Valox™ guides offer quiet, precision action throughout the most difficult passages. Olds' C-12 Custom features today's most advanced trumpet design for all of tomorrow's high-performance standards.

S-15 SUPER

Three generations of fine trombone players have praised the Olds Super S-15. The remarkable "tone band," positioned on the bell flare, provides the timbre required in contemporary music. The smooth action of duo-octagonal or fluted slides, is the result of reduced areas of contact between inside and outside slides. Superbly engineered, the S-15 features a patented one-piece bracing to give extra-strength without adding unnecessary weight to the instrument.

SPECIFICATIONS

BORE: Dual .485 - .500

MATERIALS: Red-brass bell; nickel-silver outside slide; nickel-silver, hard chrome plated inside slide; baked epoxy finish.

Available in bright silver at slight, additional cost.

P.15

CUSTOM

The production of the Olds Custom Trombone expertly combines advanced engineering techniques with traditional handcrafting skills. It assures the mature artist a truly responsive instrument capable of meeting his most exacting requirements. The precision calibrated bore affords exceptionally clear projection in all registers. The mouthpipe venturi is precisely located to permit ease of blowing while the widely spaced slide tubes allow feathertouch slide action. Both of these fine features deliver a fatigue-free performance.

A-20

AMBASSADOR
WITH F ROTOR

The Olds Ambassador A-20 is a remarkably fine student trombone. A large bore tenor trombone, it is equipped with a rotary valve "trigger" to encompass the full range of a bass trombone and to eliminate those awkward 6th and 7th positions. The F trigger permits the performer to play low B's, C's, E's and F's perfectly in tune and provides alternate slide positions for increased facility. As with the A-15 Ambassador Trombone, the dual bore design produces a full, resonant tone with little effort by the player. A lightweight, durable instrument designed to withstand the rigors of daily student use.

SPECIFICATIONS

BORE: Dual .495 - .510 (rotor .515)

MATERIALS: Brass; nickel-silver, hard chrome plated inside slide; baked epoxy finish

WEIGHT: 58½ ounces

BELL: 8½"

Supplied in Deluxe Case with accessories.

R-20

RECORDING WITH F ATTACHMENT

The Olds Recording R-20 is a skillful blend of custom design and precision engineering. The beautifully engraved Red-brass bell "darkens" the tone to complement the full sound and instant response of the dual bore. An Olds exclusive, the fluted slides reduce friction and insure feathery slide action. Difficult slide positions are eliminated merely by depressing the rotary trigger with the left thumb. The rotary valve also extends the range of the instrument a perfect fourth lower so that bass trombone parts can be played.

SPECIFICATIONS

BORE: Dual .495 - .510 (rotor .515)

O-25

TENOR TROMBONE WITH F ATTACHMENT

The Olds O-25 is a masterful combination of expert engineering working closely with quality craftsmanship. Together, they add up to a horn with the utmost tone and response. The large bore provides superior tone projection and volume while the Red-brass bell adds that dark timbre today's advanced artists are after. The F attachment lets the O-25 double as a bass trombone or as a tenor horn with the flexible trigger feature. The O-25 Tenor Trombone is the perfect instrument for the musician that wants to play his best in every musical style.

S-24G

BASS TROMBONE (B^b-F-E-G)

Olds' S-24G is a whole new concept in bass trombones. It makes those driving low notes speak with greater authority than ever. And the big 9½" red-brass bell makes them full-bodied and mellow. The G and F rotor combinations reduce the length of the slide travel giving the artist extra facility and flexibility. The S-24G gives the sensitive musician full freedom of expression. And he'll sound great just being himself.

SPECIFICATIONS

0.21 MARCHING TROMBONE

Lightweight, compact and versatile, the new Marching Trombone by F. E. Olds & Son is a welcome addition to any band. Instead of slides, valves give it greatly increased articulation over conventional slide models.

And for greater projection of sound, so necessary on the marching field, the Olds Marching Trombone features a straight bell front.

Specially engineered and built for the marching band, it also allows the baritone player to double on trombone in the stage band. These features add up to an instrument that allows greater maneuverability while maintaining exceptional response and intonation.

MIDDLE BRASS

The Olds A-42 Marching Mellophone is one of today's most exciting new instruments. Already, this young horn is the choice of the nation's top bands. It's compact for easy handling through the most intricate marching maneuvers. And it projects the fullest, most "mellow" tones. Olds has overcome the traditional intonation problems other Mellophones suffer. The A-40 Mellophone is an ideal student instrument. It can withstand the roughest student handling, yet it adds a new dimension to the band. Olds A-44 Ambassador is redesigned to meet all of today's special alto horn demands. It's a lightweight instrument with a powerful, commanding delivery. Olds offers every student and professional the most advanced horn design so they can play to their fullest potential.

LOWER BRASS

O-99 UPRIGHT BB^b TUBA

Here is the tuba that's creating waves of excitement among performers and band directors alike. Only 16 pounds, this lightweight can provide the full resonance required of any bass. Young students as well as professionals enjoy the fast valve action and flexibility. Unexcelled intonation in every register is sure to please any performer or conductor.

SPECIFICATIONS

BORE: .656"

MATERIAL: Brass; baked epoxy finish

WEIGHT: 16 lbs.

BELL: 16"

Upright BB^b tuba case extra.

O-99-4 UPRIGHT BB^b TUBA (not shown)

Similar to the O-99, except for the addition of the 4th valve. Weight 19 lbs.

O-96 FIBERGLASS SOUSAPHONE

Using advanced techniques in working with fiberglass, Olds has created an instrument of unprecedented strength and resistance to damage. Yet, no compromise has been made with musical quality. The O-96 is free-blowing but with just the right amount of resistance to produce the ideal "feel" and to permit the player to fill the horn. Four lug nuts permit quick removal of the valve section for shipment or ease of repair. Here is the choice of the top show bands . . . the O-96!

SPECIFICATIONS

BORE: .686"

MATERIAL: U.S. Rubber Royalite; ABS bell; brass receiver, mouthpipe, and valve section.

WEIGHT: 18 lbs. 8 oz.

BELL: 26"

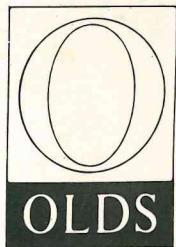

COLOR: White only.

Fiberglass Sousaphone case extra.
